EDUCATION

MD/PhD	University of Washington Medical Scientist Training Program Mentors: Paul Nghiem, Manu Setty, Evan Newell	2022 - present
BS	Stanford University, Computer Science Concentration in Biocomputation GPA: 3.99	2017 - 2021

HONORS AND AWARDS

Poster Prize – Fred Hutch Basic Sciences Division Retreat Third place award for best poster	2025
Oliver W. Press ARCS Endowment Award Achievement Reward For College Scientist scholarship to help fund PhD training	2024
Stanford Bio-X Summer Research Grant Funding for undergraduate research in the Dermatology department	2020
Tau Beta Pi Member Engineering honors society at Stanford	2020
Stanford VPUE Conference Grant Award to present research at Society For Investigative Dermatology Annual Meeting	2020
Mayo Clinic Summer Undergraduate Research Fellowship Fellow studying glioblastoma in the Precision NeuroTherapeutics Program	2018 & 2019
TGen Helios Scholar High school intern in the Helios Program at TGen	2016
Helios Symposium Poster Award Winner Awarded for a top 10 poster at the intern symposium	2016

RESEARCH EXPERIENCE

Graduate Student , University of Washington & Fred Hutch Cancer Center Advisors: Paul Nghiem MD/PhD, Manu Setty PhD, and Evan Newell PhD - Studied mechanisms of immunotherapy resistance using spatial multi-omics technologies - Developed novel computational approaches for spatial transcriptomics data analysis	2023 – present
Research Associate , Lee Lab, Stanford Medicine Advisor: Carolyn Lee MD/PhD	2021 – 2022

- Investigated mechanisms of perineural invasion using single cell sequencing
- Performed a meta-analysis of publicly available cSCC RNA-Seq datasets
- Studied metabolic reprogramming caused by non-coding mutations in OXA1L

Undergraduate Researcher, Lee Lab, Stanford Medicine

2017 – 2021

Advisor: Carolyn Lee MD/PhD

- Characterized novel genes implicated in skin cancers using multi-omics data
- Examined survival data to find biomarkers for squamous cell carcinoma (SCC)
- Analyzed proteomics data to identify novel interactors for melanoma oncogene RAC1

Summer Undergraduate Research Fellow, Swanson Lab, Mayo Clinic

2018-2019

Advisor: Kristin Swanson PhD

- Analyzed MRI data to study blood brain barrier disruption in glioblastoma (GBM)
- Trained machine learning models to predict drug distribution in the brain from MRI
- Built prognostic models using radiomics data to predict patient survival

Helios Scholar, Translational Genomics Research Institute

2016

Advisor: Seungchan Kim PhD and Gil Speyer PhD

- Redesigned the lab's EDDY algorithm to use NVIDIA's CUDA API
- Helped secure \$200,000 Compute 4 the Cure grant from NVIDIA
- Achieved 500x speedup; the algorithm can now analyze previously impossible datasets
